Skippi 650 Cruiser, designed by J. Pieńkowski, is a spectacular combination of speed and tourism comfort. If you are a fan of speed but also enjoy pleasure cruising, the Skippi 650 Cruiser is just the boat you've been looking for. The perfectly balanced sail energy of this boat makes for a fascinating sailing experience. At the tiller, you will think of nothing but fun and sport – the more so since we took great care to guarantee full safety for all on board. The centerboard with bulb iron, handrails, comfortable cockpit, unsinkability – all this will let you go to extremes in sailing with any crew you will be able to muster. And after an exhilarating day of sailing, you will be able to relax in the boat's comfortable cabin. The Skippi 650 Cruiser is light enough to be towed by practically any vehicle to whatever waters you dream of sailing on, however distant. Spontaneity is a state of the soul, a willingness to go along with one's impulses and any new ideas that may suddenly come to mind. In the Skippi 650 Cruiser – this perfect combination of cabin comfort, facility of road transport and fascinating sailing capabilities – you will find your spontaneity limited only by your imagination.
