Sunmaid 20

"The best little boat that was
ever built"
A little treasure!

Sunmaid Yachts

Sunmaid 20

The Sunmaid 20 is a ballasted centreboard trailable yacht, of medium displacement, designed to race comfortably in competition in J.O.G., quarter-ton, or trailer yacht divisions, and also to provide safe and comfortable family cruising. It was designed in New Zealand by JB Brooke MRINA (NZ) and approximately 270 have been built since its inception. The Sunmaid 20 is one of the most popular of small boats ever to be built and has been enjoyed by thousands of amateur sailors. Sunmaid Yachts is releasing a limited number of hull/deck mouldings in kit form to enable enthusiasts to go sailing, in a vessel that they have easily and inexpensively completed for themselves.

The Sunmaid 20 sleeps five people in comfort and is ideally suited for home completion in spare time and as finances allow. A person handy with a few basic tools will be able to produce for themselves the 'best little boat afloat' for a fraction of the cost of a factory-completed vessel.

Stage One Kit.....

- Hull in sparkling white ISO NPG gel coat, fully laminated to designed specifications using top quality marine grade laminating resin. Centre plate case, ballast and towing eye fitted.
- Cabin furniture fitted and bonded to hull including galley unit, icebox and water tank as integral part of furniture.
- Deck fitted and bonded to hull, wiring loom fitted for interior and navigation lights, deck beam fitted and reinforcement for winches, jib tracks etc fitted.
- All hatches and relevant mouldings supplied but not fitted.

Also included are:

- Centreplate pattern, tiller pattern, rudder box & rudder patterns and construction details.

Also available are:

- Rudder/Rudder box kit comprising fibreglass rudder shells, aluminium rudder box castings and laminated wooden tiller blank ready for final shaping.
- Centreplate comprising 1/2" galvanised mild steel centre plate with all holes and lifting eyes ready for fitting
